STAKEHOLDERS LIST:

Direct Stakeholders:
- Club Members
- Club Leaders / Administrators (students)
- Students (Potential Members / Visitors)
- System Administrators (IT Staff)

Indirect Stakeholders:
- University Management / Faculty Advisors
- University IT Department
- Student Government/Committee

USER STORIES:

General
- Like anyone, I want to be able to log in so that I can access the website.
- Like anyone, I want to browse a list of clubs and upcoming activities so that I can view clubs and upcoming activities.

Student
- As a student, I want to enroll in a club so that I can participate in club activities.

Club member
- As a club member, I want to unenroll from a club so that I can be free.
- As a student, I want to share my experience from being in a club by writing them a comment/review so that I can express my ideas.

Club vice-presidents (+ Club leader)
- As a club vice-president, I want to see, accept and reject enrolment so that I can easily manage my club.
- As a club vice-president, I want to kick out members so that I can easily manage my club.

Club leader
- As a club leader, I want to approve new event posts before they are published so that our club's page remains accurate and professional.
- As a club leader, I want to set the maximum number of club members so that people can see how many seats are available.

- As a club leader, I want to promote club members to vice-president and vice-versa so that I can easily manage my club.
- As a club leader, I want to have the possibility to change the description of the course so that I can show the important information.

REQUIREMENTS:

Functional (what it must do):
- Allow a student to browse a list of clubs and upcoming activities.
- Allow a student to enroll.
- Allow a student to log in to their personal area
- Allow a student to comment/review on clubs he has been in.
- Allow a club vice-president to see, accept, and reject enrollment.
- Allow a club vice-president to set the maximum number of club members
- Allow a club president to manage club members' permissions.
- Allow a club president to approve new event posts before they are published and to modify the description.

Non-functional:
- Security: HTTPS
- Reliability of comms: email/in-app notifications queued & retried on failure.
- Compatibility: the latest version of Chrome, Safari, Edge.
- Privacy: Interest/enrollment data is visible only to that club's leaders/admins; exports are permissioned and logged.
- Simplicity: Having an organized and easy-to-navigate UI
